Android/iOS Developer Needed

We are GelGit, a smart transportation platform, revolutionizing the way we move. Our mission is to digitize all traffic flow and offer mobility at the tap of a button. Our app is used by thousands of people and we take great pride in offering new services to the city of Izmir.

We are looking for a hustler to join our software engineering team to develop our iOS/Android app. Our team is spread out between Istanbul, Silicon Valley, and now Izmir.

Responsibilities:

- Work with our product team to build a kick ass product
- Develop new features for our rider app through API implementation
- Test new code and improve existing through refactoring

Qualifications :

- Well versed in Objective C and/or Java
- Experienced in developing code
- Eager to learn and up to date with latest iOS/Android development

This position will be based in Minerva at Yasar University, Izmir. Awesome opportunity to get involved in an exciting startup with world class team. You will also benefit from ride credits for you to travel in style via GelGit.
