

ephesus healing

Full Stack Developer for Ephesus Healing

Ephesus Healing is an amazing place to create new solutions primarily for Healthcare Industry. We are looking for talented, passionate, loyal, creative Software Engineers, graduated from Computer, Electronics or Industrial Engineering departments of top notch universities that can be a part of our team at least for the next five years focusing on Artificial Intelligence, Machine Learning, BlockChain and Mobile Development.

You need to be passionate about Computer Programming and Software Engineering and already accomplished successful projects alone or as a part of the team. Python is the preferred programming language but experience with Octave, Matlab, C++, R is nice to have.

You need to be a researcher, identifying, integrating and manipulating frameworks to solutions rather than coding from scratch.

You need to be a continuous learner, ready to the deep concepts behind Machine Learning (Learning Algorithms, Neural Networks etc) and BlockChain (Consensus Mechanisms, Distributed Ledger etc)

You need to be a team player and team builder. To be successful as a team is the primary focus, you need to share with your team your experiences, and learn from them as well.

You need to be an effective communicator and act as an ambassador of Ephesus Healing.

Your English level needs to be advanced to work and grow your career globally with Ephesus Healing

You need to establish Agile Development Methodologies while developing Software.

You need to be an innovative thinker, able to provide an idea and execute it from inception to launch.

You need to be socially responsible. In Ephesus Healing we love the nature, we love to help people and be a part of the universe.

If this is interesting for you and you are ready to invest in your long term career please send an email with your cover letter and resume with your projects, achievements to ozenc.mag@epheal.com
